cubbies V1 — XIAO ESP32-C3 series build. Modules are wired by hand (assembly.md): U1 odd pins = XIAO left row D0..D6, even pins = right row 5V..D7.
C3 Super Mini prototypes: buzzer GPIO0, SDA GPIO8, SCK GPIO4, MOSI GPIO6, CS GPIO7, DC GPIO5, BCLK GPIO2 (+47k), WS GPIO3, SD GPIO10, TOUCH GPIO1, SCL GPIO21.
Module symbols use a logical pin order, not the physical header order: wire from the module silkscreen.
Values in the benches are read from this sheet: hardware/electronics/sim/schematic.lib (run.sh).

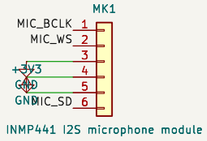

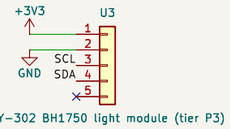

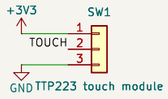

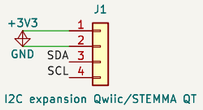

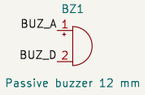

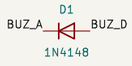

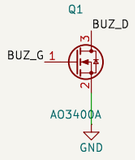

Calculations: docs/hardware/calculations/log.md
GPIO contract: docs/hardware/electronics-spec.md (ADR-0015)
